The *Bibliography of Agriculture* is a monthly index to the literature of agriculture and the allied sciences received in the National Agricultural Library. Magnetic tapes supplied by the library are computer processed, using several vocabulary control mechanisms. The resulting subject and author indexes provide access to the literature in considerably less time than would be required by traditional indexing techniques.

INTRODUCTION

The *Bibliography of Agriculture* is a monthly index to the literature of agriculture and allied sciences, based upon the indexing records prepared by the U.S. National Agricultural Library, for its CAIN (Cataloging and Indexing) computer system. Macmillan Information, a division of the Macmillan Publishing Company, Inc. prepares and publishes the Bibliography under the control of its own computer indexing system.

CONTENT

The National Agricultural Library collects literature related to agriculture from world wide sources. Publications are considered for inclusion in the CAIN System if a summary, abstract or title is available in a language in which the Library has expertise. The Bibliography includes journal articles, pamphlets, government documents, special reports, proceedings, etc. Books, new serials and other materials recently cataloged by the Library are announced in the *National Agricultural Library Catalog* published by Rowman and Littlefield.

Articles of substantial interest to the agricultural community are selected by specialists on the library staff. Editorials, letters to the editor, regular columns, and articles signed with pseudonyms or initials are not included. Indexing of articles on the processing of agricultural products is limited to those on primary processing. Generally material must have been published in the current year or the preceding year, but exceptions are made for comprehensive volumes or works of special significance to a wide audience.

The Bibliography is now divided into five sections: A main entry section, a subject index, a geographic index, a corporate author index, and a personal author index.

MAIN ENTRY SECTION

The main entry section provides full bibliographic data for the records added to the CAIN system during the preceding month by the National Agricultural Library.

Entries are assigned to one (or more if appropriate) of the broad subject categories shown in the table of contents. The array of subject categories was increased in 1973 to facilitate browsing through a small number of citations of high relevance to a particular interest. Approximately equal numbers of citations will fall into each category over a given period of time. In assigning materials to the categories, first consideration is given to the aspect, discipline or methodology involved, so that the categories will enhance information given in the title.

Within each category, entries are arranged alphabetically by journal title abbreviation. This permits rapid locating and scanning of articles from journals which are known to be relevant.

Each entry begins with a six digit identification number assigned sequentially throughout a volume year. This number serves as an identifier for the item in the various indexes. The call number of the National Agricultural Library is also noted on the first line of each entry, and should be included in any correspondence with the library. All titles are in English, using the Library's translations of non-English titles as necessary. If the text is other than English, the original language is indicated in parentheses following the title, using the following notations:

(Afr)	Afrikaans	(Fle)	Flemish	(Lit)	Lithuanian
(Alb)	Albanian	(Fre)	French	(Mac)	Macedonian
(Arm)	Armenian	(Geo)	Georgian	(Nor)	Norwegian
(Aze)	Azerbaijani	(Ger)	German	(Pol)	Polish
(Bel)	Belorussian	(Gre)	Greek	(Por)	Portuguese
(Bul)	Bulgarian	(Heb)	Hebrew	(Rum)	Rumanian
(Bur)	Burmese	(Hun)	Hungarian	(Rus)	Russian
(Chi)	Chinese	(Ice)	Icelandic	(Ser)	Serbian
(Cro)	Croatian	(Ind)	Indonesian	(Slo)	Slovak
(Cze)	Czech	(Ita)	Italian	(Slv)	Slovenian
(Dan)	Danish	(Jap)	Japanese	(Spa)	Spanish
(Dut)	Dutch	(Kor)	Korean	(Swe)	Swedish
(Est)	Estonian	(Lat)	Latin	(Tha)	Thai
(Fin)	Finnish	(Lav)	Latvian	(Tur)	Turkish
				(Ukr)	Ukrainian

In order to identify bibliographic elements within each main entry, note the following:

SUBJECT INDEX

The vocabulary of the Bibliography of Agriculture is derived from the indexed literature. As a result, it reflects both natural language and scientific terminology. The reader must keep this fact in mind and approach the subject index without any preconceived taxonomy in mind. For example, data on a particular member of the ACARIDAE family may be found under TICKS as well. Prevention measures will be found under ACARICIDE.

The reader should plan his search in terms of the most specific natural language term prior to searching under a scientific term. However, note that the vocabulary is an open ended one and new terms are added each month. Undoubtedly readers will be more keenly aware of crucial search terms within their own fields of research. If such terms are missing, we hope readers will notify the editor of such gaps. The Subject Index will increase its utility if there is frequent interaction between the research community and the editor.

All entries are based on single words in the title (and title enrichment when added by the library). An entry will be made whenever a title word matches a word on the authority file, which currently contains over 25,000 terms. The file is organized so that in most cases synonymous terms are grouped together under a single subject heading. Thus singular and plural forms are grouped under a single term as are grammatical variants:

PROTEINS (singular and plural variation)

I. Water, fats, ash & salt. II **Protein**

Modifying **proteins** for maximum utilization

MANAGEMENT (grammatical and term variation)

profits through nutrition and **management**

Management agricultural extension

* **Administration** of agricultural cooperatives

Techniques of **administering** apiaries in apiculture

* Cross references are made to synonymous terms.

The title word on which the entry is based, appears in bold face type to facilitate rapid scanning of the index. A secondary word, which may either precede or follow the primary word, also appears in bold face type. These word pairs help provide finer access to desired term, particularly under headings which have many entries.

VIRUSES

Physical properties of blue-green **algal virus**

Venezuelan equine **encephalomyelitis virus**

Limited proteolysis of **potato virus X** by

with sugar beet tolerance to **virus yellows**.

If a search is required which related to a general term such as an **ACID** it would be preferable to search under the specific type of **ACID**. Very often a specific acid has already been established as a subject term. However new types of acids, or viruses or plant varieties will not have been identified in the thesaurus and under such circumstances, searching under the more general term would prove more fruitful.

We have changed the format of the table of contents to reflect the identification number ranges of each of the main entry categories. Thus, the reader can check the category under which a subject entry falls, prior to verifying it in the main entry section.

The asterisk line: * * * * *

Occasionally the reader will encounter a series of asterisks in place of title data under a term, followed by the B of A identification number. This line indicates the presence of material which is part of a series and the title data is identical to that immediately above the asterisk. The identification number given is the last entry in the series which has been entered consecutively within a particular category.

GEOGRAPHIC INDEX

As part of our goal of constantly increasing access to the literature, we have added a geographic index. This index is a direct alphabetic listing of all place names which have been indexed in association with the title. Obviously not all titles will have geographic entries. The indexing division of the National Agricultural Library will add geographic descriptors wherever it is germane to the subject of the article.

CORPORATE AUTHOR INDEX

Readers will note that the corporate author index is considerably enlarged. We are now able to indicate authorship of the publications of the State Agricultural Experiment Stations and Extension Services. The full corporate citation is given, followed by the six digit identification number referring to its appropriate main entry.

AUTHOR INDEX

All personal authors (to a maximum of ten for each citation) are included in the index. Entries are made by last name and initials, followed by the six digit identification number referring to the bibliographic data in the main entry section.

AVAILABILITY OF REFERENCES CITED

Most of the current publications of the Department of Agriculture, and publications issued by the State Experiment Stations and the State Agricultural Extension Services, may be obtained free of charge by applying directly to the issuing agency. The National Agricultural Library does not distribute them, nor does the publisher.

Users who wish to obtain full text for citations should first utilize the resources of their local libraries. For material which is not readily available from other sources, users may request material from the National Agricultural Library. Such requests must include the complete citation as well as the Library's call number. Microfilm or electrostatic copies of documents may be purchased from the Photocopying Service of the National Agricultural Library, U.S. Department of Agriculture, Beltsville, Maryland 20705. Copy charges are:

- | | |
|-----------------------|--|
| Microfilms: | \$1.00 for each 30 pages or fraction copied from a single article or book |
| Electrostatic Copies: | \$1.00 for each 10 pages or fraction copied from a single article or book. |

Payment must accompany the order. Cash, library coupons, check, or money order drawn to the National Agricultural Library, USDA, are acceptable. Payment for orders originating outside the United States should be made by international money order or draft on an American bank, or by UNESCO book coupons. Library coupons, valued at \$1.00 each, may be purchased in any quantity from the Library's Photocopying Service.

Chemical characteristics of pollen grains of certain species of maple growing in Bulgaria. [Acer]. Bineva, I I *C R Acad Bulg Sci* 26 (8): 1053-1055. 1973

023913 505 P21 (3)
Study of ectotrophic mycorrhiza of *Pinus brutia* Ten. In scanning electron microscope. (Fre) Sirulla, D G *C R Hebd Seances Acad Sci, Ser D Sci Nat* 277 (17): 1757-1760. Ref. Oct 1973

023914 SD1.C34
Growth stresses. [Trees]. (Fre) Gueunee, P *Cah Sci* 3, 52 P. Ref. Eng. Sum. June 1973

023915 470 C16C
Effects of ozone on 14CO2 [carbon dioxide] fixation patterns in pine. [Pinus strobus, *Pinus taeda*]. Wilkinson, T G *Can J Bot* 51 (9): 1573-1578. Ref. Sept 1973

023916 470 C16C
Tissue volume changes in black spruce phloem [Picea mariana]. Brudermann, G *Can J Bot* 51 (9): 1649-1653. Sept 1973

023917 470 C16C
Photosynthesis & growth of Douglas-fir seedlings when grown in different environments. [Pseudotsuga menziesii]. Sorensen, F C *Can J Bot* 51 (9): 1689-1698. Sept 1973

023918 99.8 EM72
Terminal shoot elongation & cambial growth rhythms in *Pinus caribaea*. Chudnoff, M *Commonw For Rev* 52 (4): 317-324. Ref. Dec 1973

023919 99.8 ER22
Physiological maturity & state of deep rest of hardly germinating seeds of some tree & shrub species. (Hun) Zahariev, B *J Erdo* 22 (9): 420-426. Sept 1973

023920 SD12.1314
Effect of coniferous tree species & microbial associates on nutrient mobility. [pinus taeda]. Rolf, G L *For Res Rep Agric Exp Sta Univ Ill* 73-4, 2 P. Ref. Sept 1973

023921 99.8 F7632
Pure culture synthesis of ectomycorrhizae on *Pinus ponderosa* with species of *Amanita*, *Suillus*, & *Lactarius*. Riffe, J W *For Sci* 19 (4): 242-250. Ref. Dec 1973

023922 99.8 F7632
Diurnal dimensional fluctuations in Douglas-fir stem in response to tree water status. [Pseudotsuga menziesii]. Lassio, J P *For Sci* 19 (4): 251-255. Ref. Dec 1973

023923 99.8 F7632
Tolerance of lodgepole & ponderosa pine seedlings to low night temperatures. [Pinus ponderosa, *Pinus contorta*]. Cochran, P H *For Sci* 19 (4): 272-280. Ref. Dec 1973

023924 99.8 F7632
Soil moisture influence on growth, transpiration, & nutrient uptake of pine seedlings. [Pinus radiata, *Pinus rigida*]. McColl, J G *For Sci* 19 (4): 281-288. Ref. Dec 1973

023925 99.8 F7632
July-stimulated flowering in Douglas-fir. [Pseudotsuga menziesii]. Silen, R R *For Sci* 19 (4): 288-290. Dec 1973

023926 99.8 F7632
Heat-pulse velocity & bordered pit condensation in living Engelmann spruce & lodgepole pine trees. [Picea engelmannii, *Pinus contorta*]. Mark, W R *For Sci* 19 (4): 291-296. Dec 1973

023927 99.8 F7632
Biochemical changes in seeds of Taiwan red pine & Chinese fir during germination. [Pinus taiwanensis, Cunninghamia lanceolata]. Kao, C *For Sci* 19 (4): 297-302. Ref. Dec 1973

023928 99.8 F7632
Date of pollen shedding by longleaf pine advanced by increased temperatures at strohli. [Pinus palustris]. Boyer, W D *For Sci* 19 (4): 315-318. Ref. Dec 1973

023929 99.8 F775
Water balance of young spruces after planting. [Picea abies]. (Ger) Lupke, B *Forstwiss Zentralbl* 92 (6): 311-327. Ref. Eng. Sum. Dec 1973

023930 SB126.5.15 1973
Definition of nutritive state of forest trees in soilless culture. (Spa) Munoz-Cobo, M T M In *International Congress on Soilless Culture*, 3D, Sassari, 1973. *Proceedings* 3D: 33-42. Eng. Sum. 1973

Moisture of seeds & cone berries of *Juniperus seravshchanica*. (Rus) Sakshatskii, V M In *Soveschaniye po probleme vosstanovleniya i razvitiya arkhovkh lesov Srednei Azii*, Dzhalal-Abad, 1970. *Mater P*. 165-169. 1972

023932 SD231.565 1970
Certain elements of water regime of *Juniperus seravshchanica* in western spurs of Chatkal Range. (Rus) Mikhailova, L M In *Soveschaniye po probleme vosstanovleniya i razvitiya arkhovkh lesov Srednei Azii*, Dzhalal-Abad, 1970. *Mater P*. 144-147. 1972

023933 442.8 M66
Effect of soil moisture on growth of annual seedlings of *Alnus glutinosa* & *Fraxinus americana*. (Bel) Dzhurubina, T F *Izv Akad Nauk BSSR, Ser Biol Nauk* 5: 15-20. 1973

023934 442.8 M66
System of mineral nutrition for *Pinus & Picea* growing together in forest stand. (Bel) Sirotkin, I U *D Izv Akad Nauk BSSR, Ser Biol Nauk* 5: 35-42. 1973

023935 442.8 M66
Growth of tree seedlings under different durations of illumination. [Quercus rubra, *Pinus, Picea abies*]. (Bel) Nest-siarovich, M D *Izv Akad Nauk BSSR, Ser Biol Nauk* 5: 5-10. Ref. 1973

023936 442.8 M66
Diurnal change in gaseous mixture in wood of *Picea* trees damaged by certain wood-destroying fungi. [Fomes, *Stemon*]. (Bel) Novikau, M A *Izv Akad Nauk BSSR, Ser Biol Nauk* 5: 52-55. 1973

023937 QD241.C5
Tingenone & hydroxytingenone, triterpenoid quinone methides from *Eunonymus tigris*. Brown, P M *J Chem Soc, Perkin Trans. B* 22: 2721-2724. Ref. 1973

023938 99.8 N62
Difference in environmental factors in young Norway spruce, *Picea abies* stand at different spacings. III. (Jap) Satou, S *J Jap For Soc* 55 (9): 270-276. Eng. Sum. Sept 1973

023939 396.9 P49
Mode of crystal growth of calcium oxalate in life cycle of willow leaf. [Salix babylonica]. (Jap) Umemoto, K *J Pharm Soc Jap* 93 (8): 1069-1083. Eng. Sum. Aug 1973

023940 396.9 P49
Diterpenoids. XXII. On hydrofluorene compound with strong sweetness. [Pinaeae]. (Jap) Tahara, A *J Pharm Soc Jap* 93 (8): 951-956. Eng. Sum. Aug 1973

023941 99.9 C334
Vertical distribution of pedunculate oak root system on heavy soils in unundated & unundated riverine forests. [Quercus robur]. (Cze) Sika, A *Lesnictvi* 19 (8): 687-699. Eng. Sum. 1973

023942 SD1.L4
Occurrence of FAR effect at level of dying branches as an index of shadow resistance of *Pinus sylvestris* L. (Rus) Alekseev, V A *Lesovedenie* 4: 33-39. Ref. Eng. Sum. July/Aug 1973

023943 SD1.L4
Influence of soil moisture regime on accumulation of nutrients in *Pinus sylvestris* L. needles. (Rus) Koshelev, S P *Lesovedenie* 5: 10-14. Eng. Sum. Sept./Oct 1973

023944 SD1.L4
Nitrogen accumulation in *Pinus sylvestris* L. needles with different soil moisture regimes. (Rus) Orlov, A IA *Lesovedenie* 5: 3-9. Eng. Sum. Sept./Oct 1973

023945 SD1.L4
Growth & longevity of *Ulmus pinnatolammosa* Dieck, in variously arranged stands. (Rus) Erpert, S D *Lesovedenie* 5: 45-50. Eng. Sum. Sept/Oct 1973

023946 SD1.L4
Ash alkalinity of *Larix sibirica* needles as an index of its growth. (Rus) Derizhkin, R I *Lesovedenie* 5: 84-86. Eng. Sum. Sept/Oct 1973

023947 SD1.L4
Nitrogen, phosphorus, potassium & calcium content in needles of *Pinus sylvestris* L. of different geographical provenances. (Rus) Pailani, I A *Lesovedenie* 6: 18-23. Ref. Eng. Sum. Nov/Dec 1973

023948 SD1.L4
Long term dynamics of photosynthetically active radiation inflow
